FLYBOARD 2013

EDITO

Zapata Racing announces the Flyboard new version release. The Flyboard is this flying board propelled thanks to water jets placed under the user's feet which allows him to perform air figures as well as aquatic ones.

With technical, practical and aesthetical novelties brang on the previous model, the Flyboard 2013 will offer new possibilities and sensations to its user.

ZAPATA RACING

The company PWC Product, owner of the brand ZAPATA RACING®, has been created on February 27th 2008 by Franky ZAPATA.

ZAPATA RACING® is the design, development and production "made in France" of up-market, powerful PWC destined as well as competition as water-based recreation.

With a wealth of experience and success, ZAPATA RACING® widens its range of products by creating innovative products as the Flyboard which met a huge success worldwide since it has been introduced on the market in May 2012.

FRANKY ZAPATA

Franky Zapata built his strong reputation in the Jet-ski world through the number of titles he won during his competitor career and through the conception of his own PWC under the ZAPATA RACING® brand.

His overflowing imagination combined to his expertise allowed Franky Zapata to become a full inventor.

By always looking at new challenges, the competitor wasn't satisfied with the first version of the Flyboard.

By bringing technical and design improvements on the product, ZAPATA RACING offers to his clients the Flyboard new version called Flyboard V2.

"Today I'm proud to present you the Flyboard 2013 which is the outcome of a hard-working year in order to offer the best product as magic as esthetic.

With improvements brought on the board design as well as on the quick disconnection systems, I think the Flyboard 2013 will be the reference in extreme and leisure sports."

Franky Zapata

THE FLYBOARD

The concept

The Flyboard® is the perfect meeting between wakeboard, surf, kite and jet-ski, imagined, manufactured and commercialized by the multiple jet-ski world champion, Franky Zapata. This new extreme sport allows you to get around above water like a bird, dive into water like a dolphin and realize many incredible freestyle figures. The learning is very intuitive allowing high sensations from its first utilization. The man's crazy dream for centuries to move in the air, Franky Zapata concretized it!

The functioning

The Flyboard® is a board like a wakeboard one brightens up with two pipes which, linked to a Jet-ski turbine with a 18 meters pipe, allows its user to high up to 10 meters from water. The board orientation is made by the board inclination. Two pipes fixed on the forearms' user (now optional) give two water jets, which insure a perfect equilibrium as ski poles.

The height that can be reached depends on the Jet-Ski power. With a 150HP, the Flyboarder can already high up to 5 or 6 meters and with a 250HP, the user will use the maximum pipe length that is 10 meters.

The Flyboard can be used alone or at two-users.

At two with one person on the jet who controls the gazes while the second flies on the Flyboard®.

Alone thanks to an optional electronic kit that allows to control the gazes from the Flyboard with a throttle placed in the right hand.

FLYBOARD® TECHNICAL SHEET

- ✓ 1 BOARD
- ✓ 1 PAIR OF SHOES (WAKEBOARD TYPE)
- ✓ 1 ROTATION SYSTEM (composed of specific plastic bearing balls in order to avoid corrosion, we developed a self-cleaning system using water pressure which allows the rejection of sand...)
- ✓ 2 HOSES with handle nozzles attached to the arms with a Velcro system
- ✓ 1 BIG HOSE which provides pressured water from the PWC to the Flyboard®
- ✓ 1 180° ELBOW which reverses the PWC water outlet
- ✓ 1 NOZZLE
- ✓ 1 QUICK CLIP for an easy uncoupling between the Flyboard® and the PWC

FLYBOARD 2013 NOVELTIES

- ✓ Pro-rider version included: the hand stabilizers can be removed and replaced by a plug (utilization recommended after 50h of practice).
- ✓ New quick engagement system for an easier elbow set up.
- ✓ Removable pivotal system.
- ✓ New board more resistant and new design allowing a 5km/h gain in speed and a better handling when performing submarine figures.
- ✓ Nozzles bearing included in the nozzles and circlips more resistant.
- ✓ Hand hoses more resistant and equipped with smooth handles.
- ✓ Hand support cover reinforced.
- ✓ New pearly white supply hose coated with a transparent polish.
- ✓ New nozzles equipped with a roofline to optimize the water penetration.

EMK TECHNICAL SHEET

- ✓ 1 RIGHT HAND TRIGGER AND START/STOP SWITCH which send a signal to an electronic card in the PWC
- ✓ 1 ELECTRIC CABLE linked with the electronic card
- ✓ 1 ELECTRONIC SYSTEM composed of a learning mode which manage power
- ✓ 1 ELECTRICAL MOTOR (inside the electric box)
- ✓ 1 ACCELERATOR CABLE (which links the electrical motor and throttle body)
- ✓ 1 ELECTRIC BEAM to connect the PWC (start/stop, cut out box)
- ✓ 1 ADAPTATOR which is different according to the PWC model which allows adaptation between the PWC and the nozzle

EMK 2013 NOVELTIES

- ✓ Steel cable integrated to the sheath.
- ✓ New swivel connector allowing the Flyboard rotation and disconnection.
- ✓ Electronic Kit delivered already assembled (stabilizers, elbow...).
- ✓ New throttle adapted to the Pro-Rider version.
- ✓ KAE option allowing the EMK adaptation to the electronic command jet-ski last models (Seadoo et Yamaha).
- ✓ New box watertight at 100%.
- ✓ Steel box support inclined in order to avoid water stagnation. No more bearing at the end of the elbow.
- ✓ Steel paste modification in order to reduce the acceleration cable use (KAE option).

PRACTICAL INFORMATION

✓ Where to practice the Flyboard?

The Flyboard can be practiced either in lake, pond, sea or ocean in the condition where a minimum 4 meters depth is respected. It is strictly forbidden to use the Flyboard in tight spots such as swimming pools...

✓ Where to buy it?

With a distribution network set up worldwide, the Flyboard can be purchased in each country. For further information, please visit the following address: <http://www.zapata-racing.com/flyboard/ou-lacheter/>

✓ Where to try it?

To find out more about the rental basis equipped with Flyboards, please go to: <http://www.zapata-racing.com/flyboard/ou-lessayer/>

✓ How much is it?

Flyboard Kit: 4100, 00 € excluding taxes *

Electronic Kit: 1 430, 00 € excluding taxes

*The prices vary according to location, transport and importation fees (except EU countries).
